RunPod proof of use

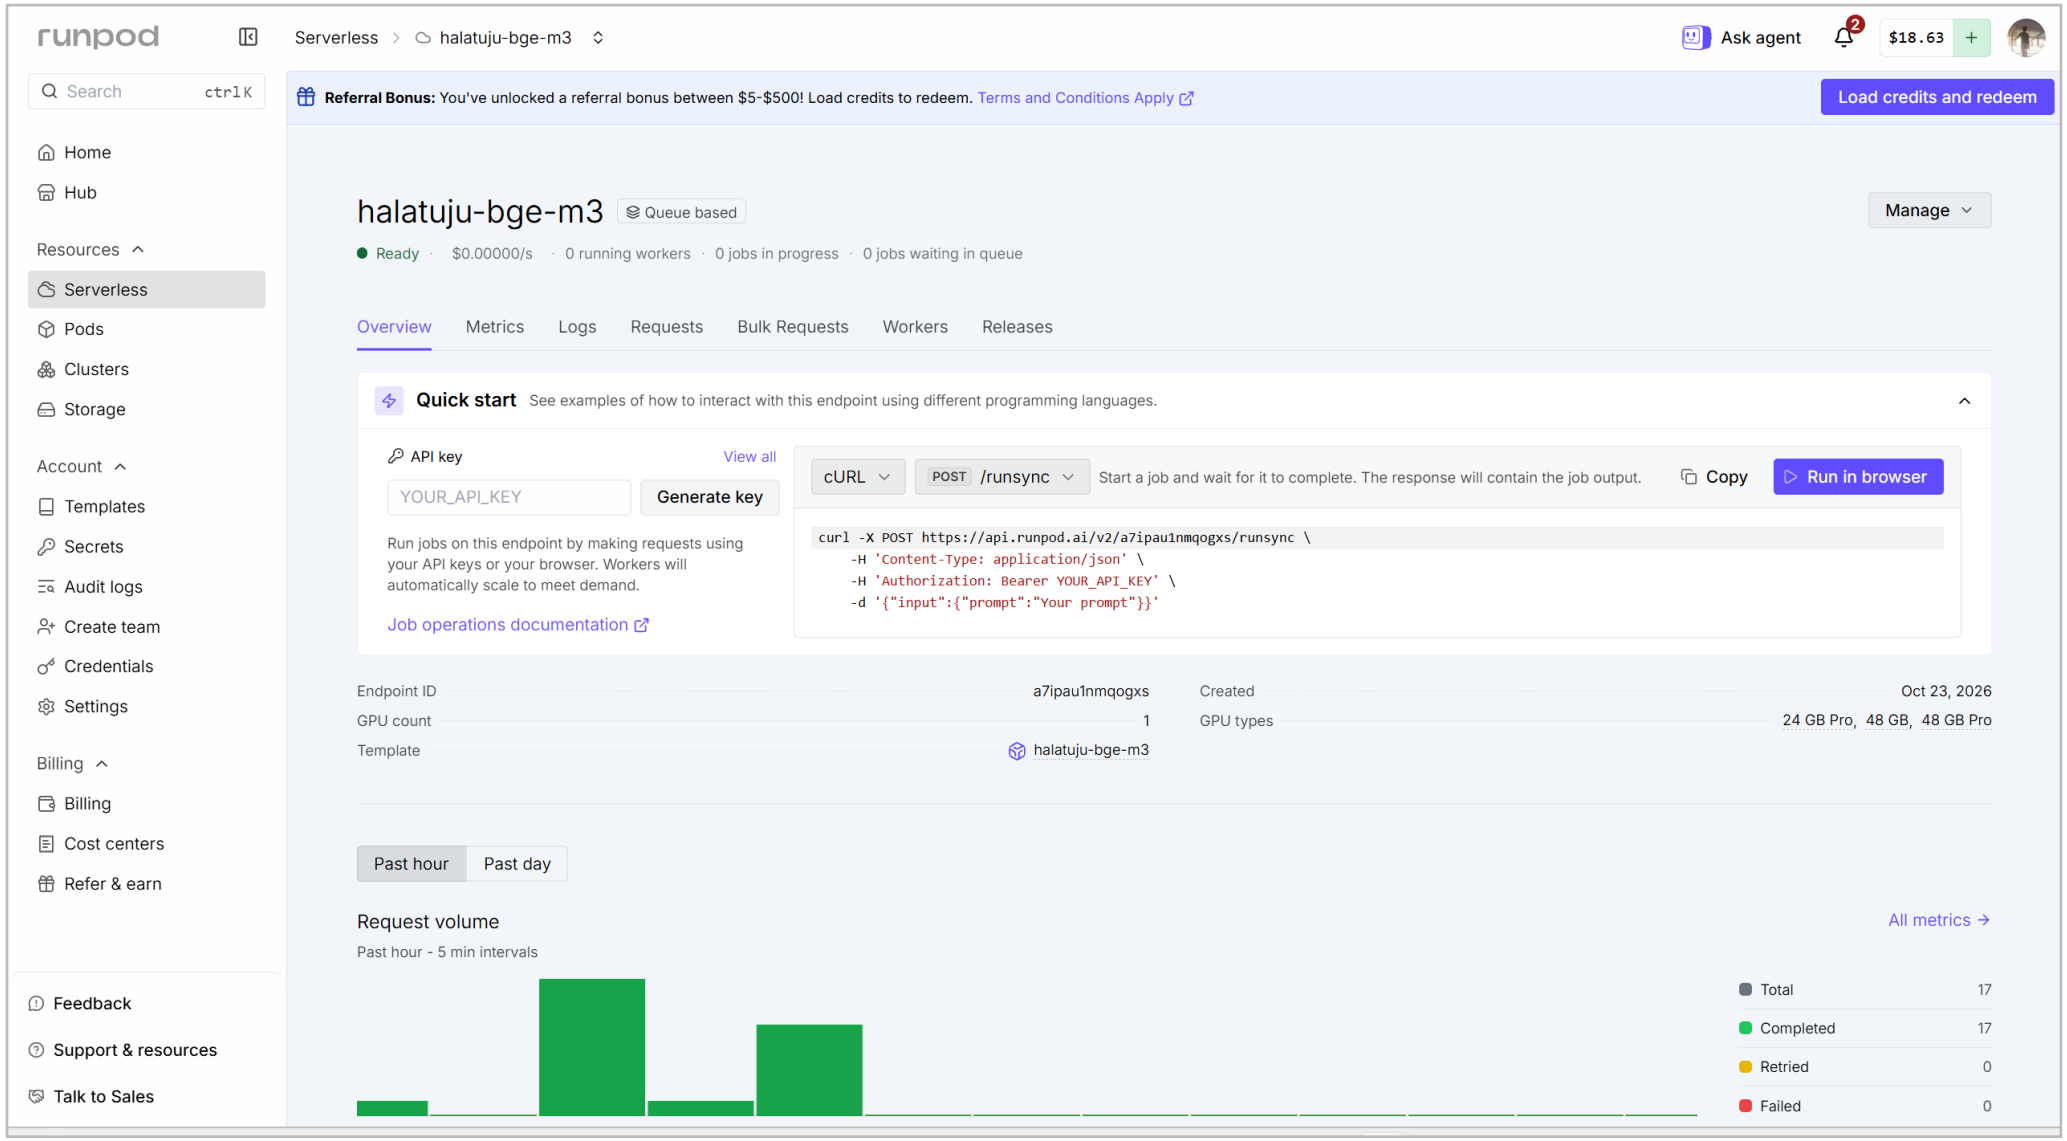

SDC Hackathon 2026 - Team Dsaise - Project HalaTuju - Domain 1

Runtime: Serverless endpoint	halatuju-bge-m3, endpoint ID a7ipau1nmqogxs (created 23 Oct 2026)
GPU types (endpoint)	24 GB Pro, 48 GB, 48 GB Pro; 1 GPU per worker; 0 active / max 1 worker; idle timeout 120 s
What it does	BAAI/bge-m3 embeddings for the live app: matching CV text to 13,939 ESCO skills, de-duplicating Job market researcher signals, ESCO duplicate checks
Training: GPU pod	Pod 38jijj8fe5dazu, NVIDIA GeForce RTX 4090 (24 GB), Secure Cloud
Pod runtime	Created 24 Oct 2026 02:20:57 MYT, deleted 02:23:25 MYT (18:20:57-18:23:28 UTC on 23 Oct): about 2.5 min
What it did	Final training run of our AI-exposure model (bge-m3 + ridge regression): embedded 19,265 O*NET tasks in 3.9 s, trained and evaluated. Log: ml/artifacts/runpod_run.log; record: ml/artifacts/runpod_run.json
Cost	About US$0.04 for the training pod (US$0.89/hr); account balance US$18.63 of the US$25 sponsor credit
Account	RunPod account of a registered team member (shown in the audit log)

Screenshots taken by the team on 24 Oct 2026 from the RunPod console. API keys are not shown.
Two earlier pods (uuwdb5w112cnjj, urxftqdjs0xm4i) failed on library versions before the final run; both are in the audit log.

1/5 Serverless endpoint overview

Endpoint ID a7ipau1nmqogxs, GPU types, template halatuju-bge-m3, requests completed in the past hour.

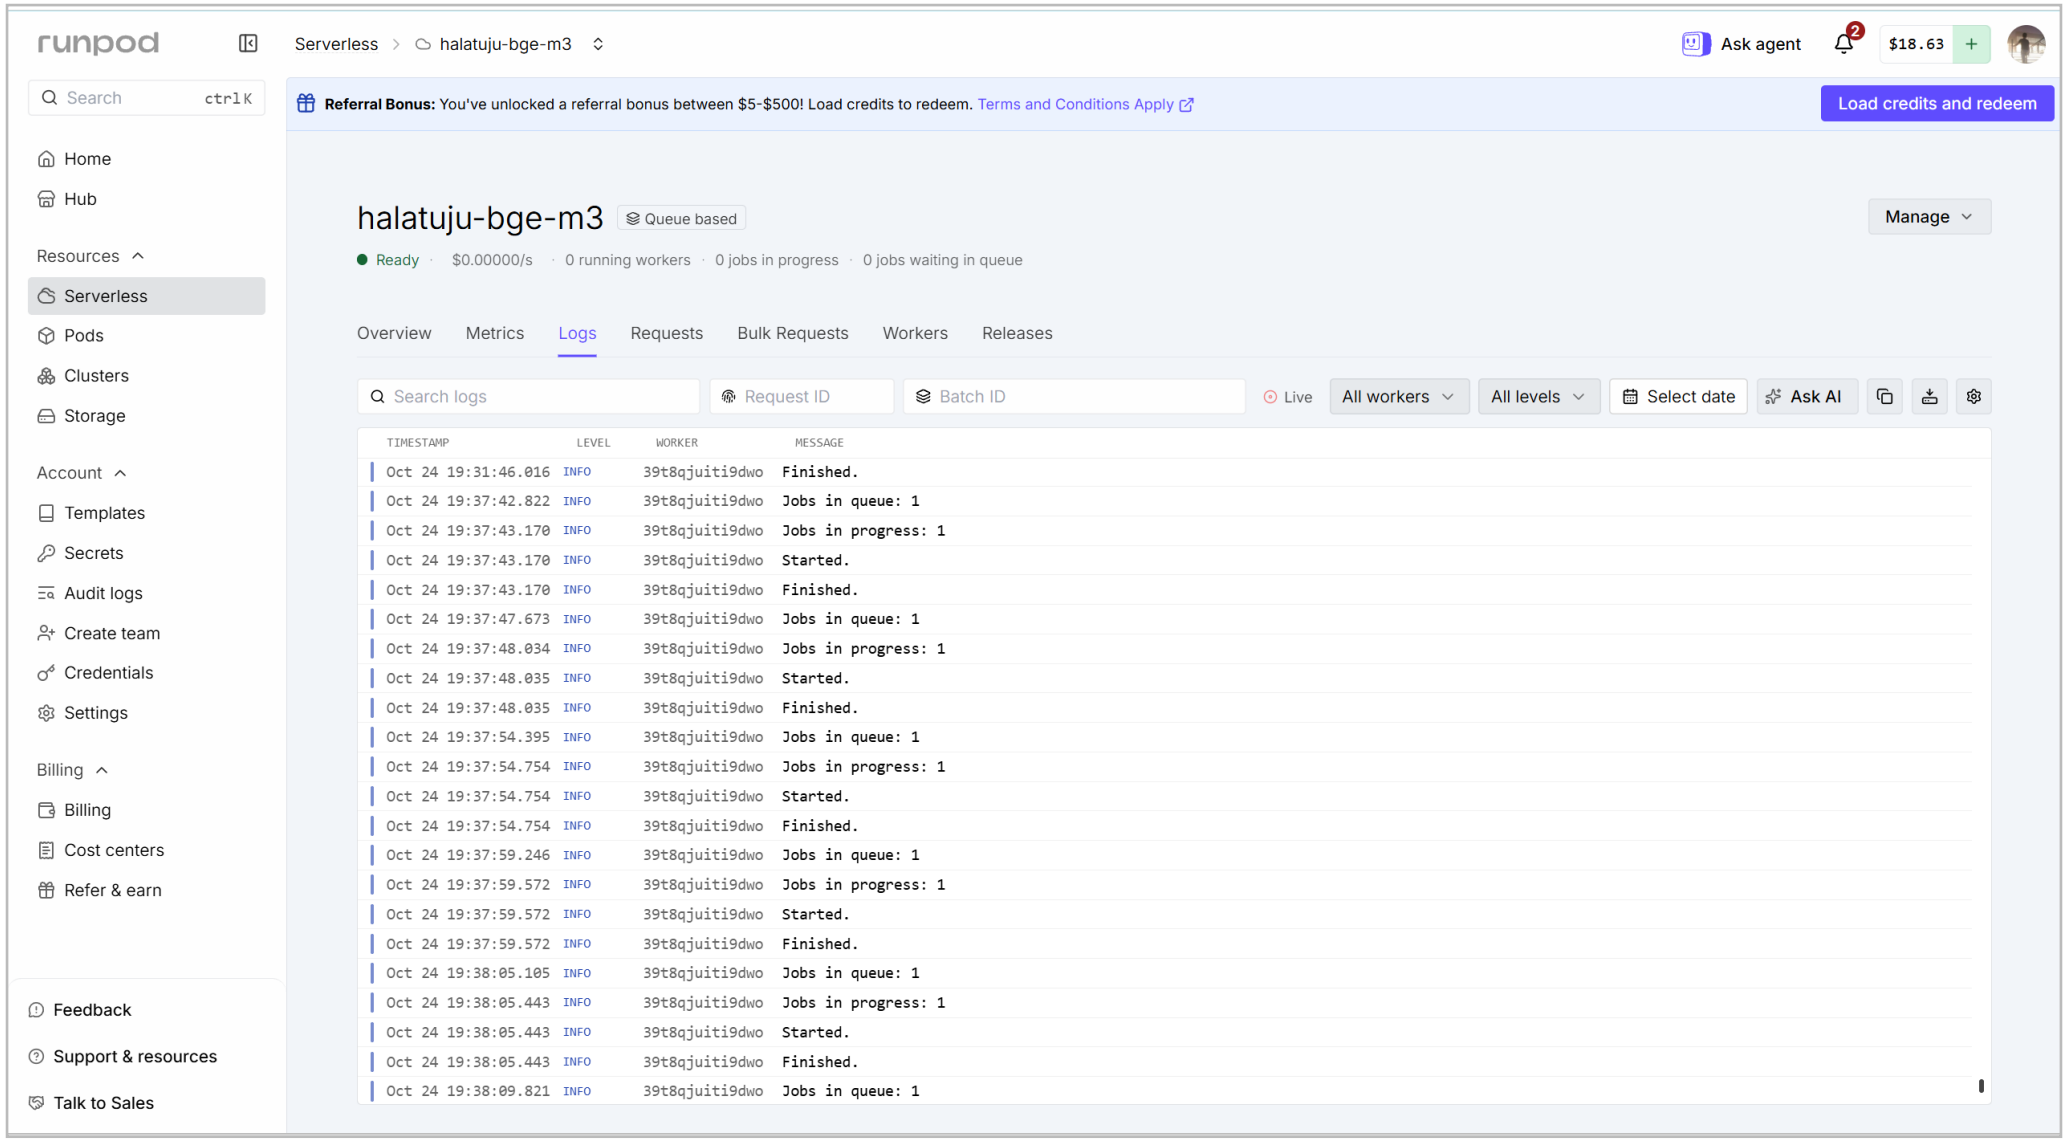

2/5 Endpoint workers and scaling

Worker states and scale strategy: 0 active workers, max 1, idle timeout 120 s (scales to zero when idle).

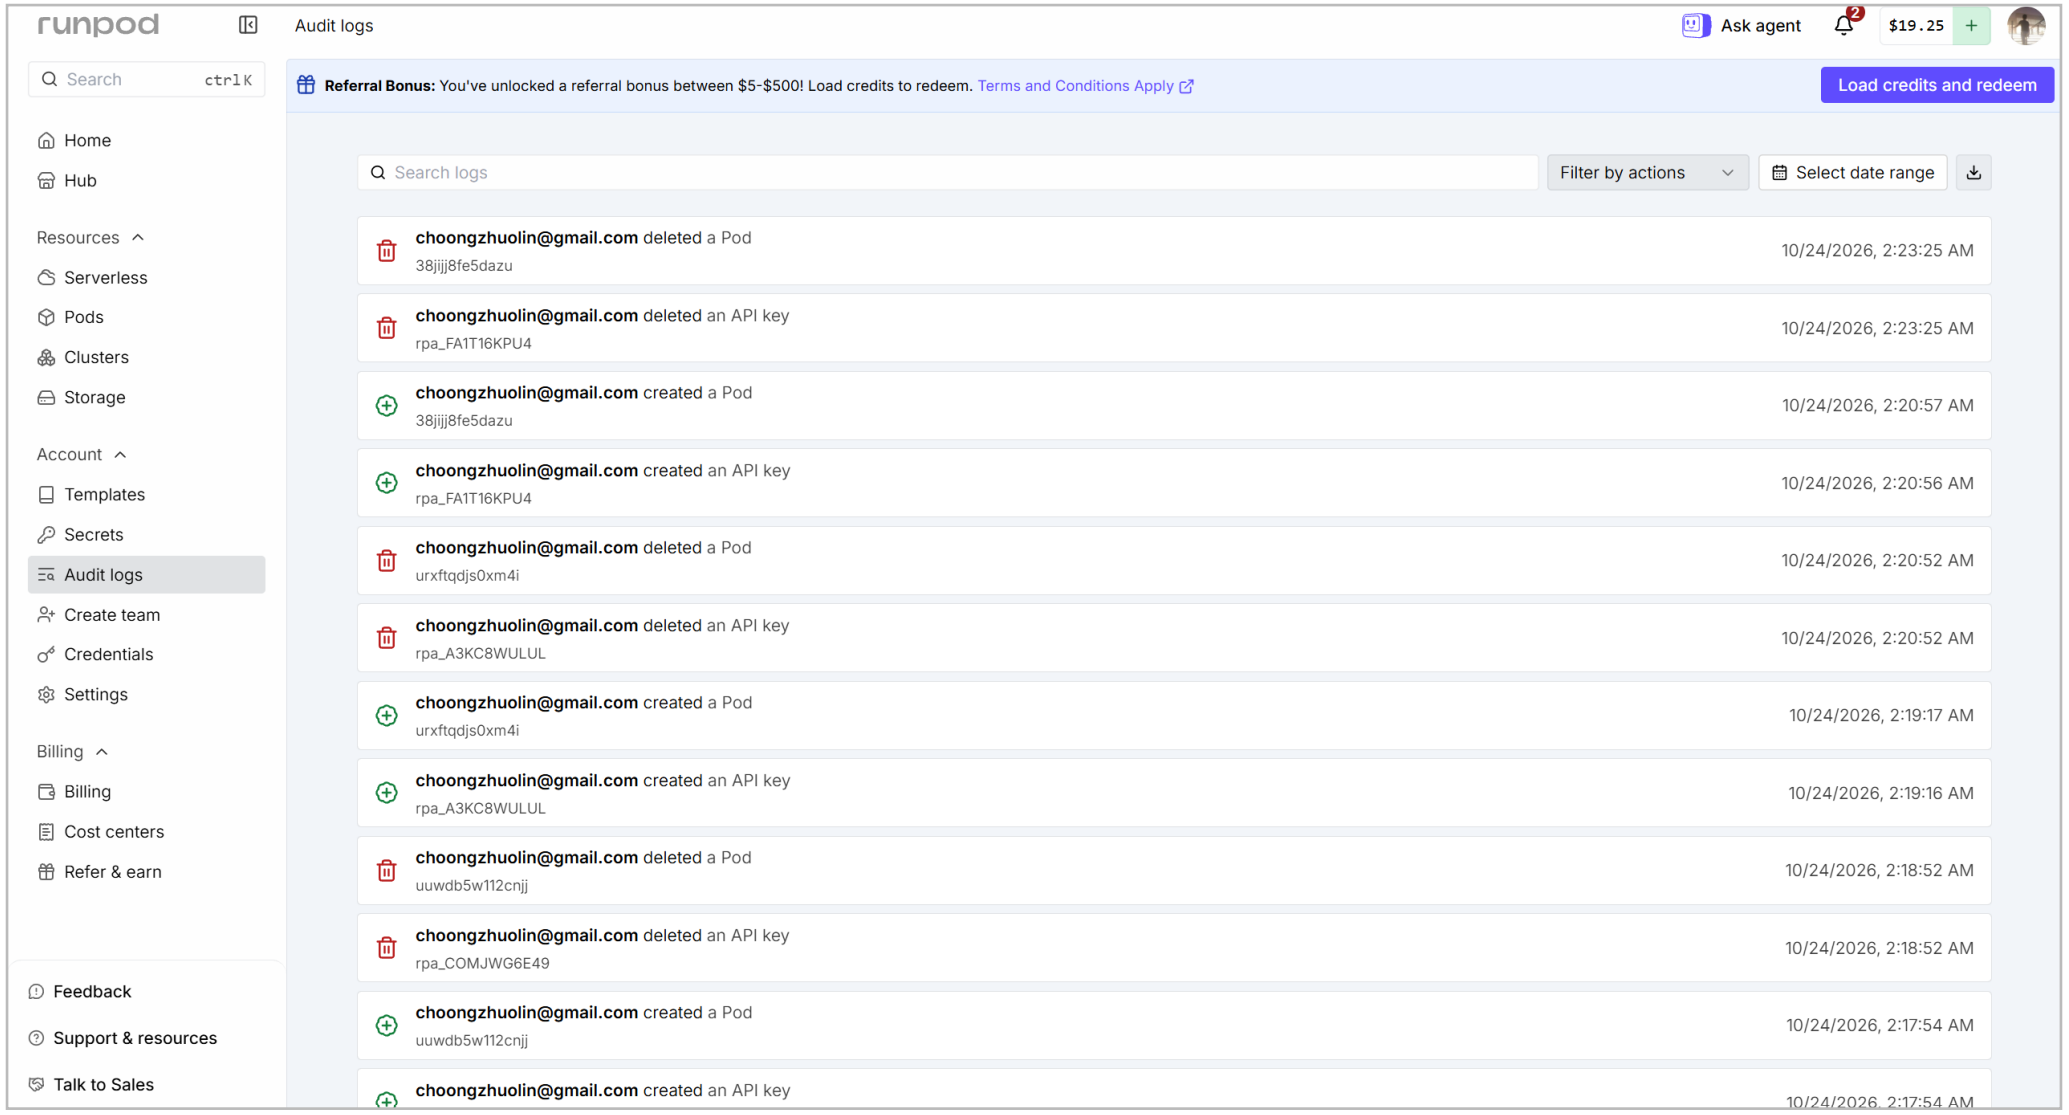

3/5 Endpoint logs

Jobs from the live app being processed by worker 39t8qjuiti9dwo on 24 Oct 2026.

4/5 Audit log: training pod

Pod 38jijj8fe5dazu created 02:20:57 and deleted 02:23:25 (24 Oct 2026, MYT): the final RTX 4090 training run, about 2.5 minutes.

5/5 Billing

Account balance US$18.63 from the sponsor credit; spend rate US$0.000/hr when idle.
